GB REACH & EU REACH from 1st January 2021

From 1st January 2021, following the departure of the UK from the EU, the UK based INEOS Compounds site, INEOS Compounds Aycliffe Ltd is no longer an actor in EU REACH Regulations. All PVC compounds we export to the EU/EEA contain substances that have existing registrations or exemptions under EU REACH, therefore the substances involved are regarded as substances re-imported in mixtures under Article 2.7c.

We are required to provide information to downstream users of any CLP classification of our compounds and any hazardous substances in our compounds, and will continue to carry this out by way of Safety Data Sheets and appropriate labelling.

From 1st January 2021, INEOS Compounds Aycliffe Ltd is an actor in GB REACH as a formulator. We are working with our suppliers to ensure that substances in the raw materials we use that need to be registered, are registered in GB REACH within the specified timescales.

We will comply with our UK formulator obligations by supplying information on hazardous substances in our compounds by way of Safety Data Sheets and appropriate labelling.

Yours faithfully

M. Amour

QA & Regulatory Affairs Manager
